1. Base64Caeser

   Find the flag value:

   aGVsbG8geW91IGFyZSBhd2Vzb21lIGZsYWcaXMgY2hhcmlzbWE=

2. Substitute

   Find the password:

   Decode the dutch message that start with "leuk he zo'n subst…"

   ogrk hg tl'n srbszizrzig aiphgu

   mg ycahzylluf vllu fg ahcoogneg

   pceinc is ngzdluag

3. XORCrypt

   Find the password from the following two binary strings

   "100100110010100110010100100001101010010100010101101001110101010101010101101001
   010101100011110011010011101011010010101011010010100010101110110101011101011010"

   111001110100000111110001101001101101010101110100110101000010011000100001111110
   100001000110101001000110101011101111011110000010001100110010111110001101000"

4. DECCrypt

   Find Password

   849091049091019091129099790911590911590911990911190911490910090910590911590910
   0909101909990999909111909110909118909101909114909116

5. Find the plaintext from this Hash

   202cb962ac59075b964b07152d234b70
